

Suzanne Szenher

WEB DESIGN & FRONT-END DEVELOPER

very briefly.

I design clean and simple handcrafted websites that are affordable and search engine friendly. I believe web design should be simple and effective with a clear message. I love minimal design, and code clean XHTML & CSS.

I work from my small web studio in North Lincolnshire, England. My goal is to provide entrepreneurs with quality, affordable website development, and to help promote the web as a creative and empowering communications tool.

what do I do?

My services include:

Custom web design - hand built from scratch just for you.

Website re-designs - if your site is in need of new look, I can give it a makeover. Your new site will be hand coded, SEO customized, W3C standards compliant, cross-browser compatible, and easily accessible for your visitors.

Website packages - set price sites built from scratch to suit your needs including web hosting, domain name, email, contact form.

Content Management System (CMS) - manage and update your own site.

Hosting and domain names

Website maintenance - I can provide fast and cost-effective maintenance services both for the clients who order designs from me, or for whoever needs to maintain and update their site. I will backup, edit, update and fix your site while you are running your business.

why choose me?

My clients come first - if you are not happy, then I'm not happy, and will work with you until you are.

Price - working freelance means that I can keep my overheads low and pass the savings on to my clients.

Communication - I am always at the end of the phone during office hours and e-mails are always dealt with as quickly as possible. Nobody likes to wait, so I will do my best not to leave my clients waiting.

Reliable and honest service - I will always provide you with an honest assessment of your needs, and will never try to sell you something I don't think would be of benefit to you.

Simple, clean design - I believe that a simple, well designed site is one that looks good, is easy to use and conveys your message clearly. All of my work is hand-coded using current web standards.

Friendly - I always listen to my clients and give honest, friendly advice during our working relationship, ensuring that the website I design for you is the site that you want.

What is handcrafted web design?

You may be wondering what handcrafted web design means. Well, it simply means that your website is lovingly hand-coded from scratch using XHTML & CSS, ensuring that your site is simple, usable and attractive, with good readability and accessibility, using web standards.

If you would like me to provide you with a quote for your project, please get in touch.
